-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

2. The disclosure is objected to because of the following informalities: Page 9, line 16, "malting" appears to be a misspelling word. Appropriate correction is required.

3. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

4. Claims 13-30 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a coating of inorganic insulating material wherein the insulating material is in particulate form, does not reasonably provide enablement for a non-particulate coating (e.g. film coating) of inorganic insulating material. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or the invention commensurate in scope with these claims. The specification only teaches surface coating the magnetic material powder with an inorganic insulating material wherein the insulating material is in particulate form. Claims 13-30 relate to an insulating material that could be a film. There is no description in the disclosure as to how a film coating is formed on the particulate powder. Therefore, claims 13-30, which fail to include the particulate form of the inorganic insulating material, are deemed broader than the enabling disclosure.

Response to Arguments

5. Applicant's arguments, filed April 9, 2007, with respect to the previous rejections, including the double patenting rejection and prior art rejection, have been found persuasive. The rejections are hereby withdrawn.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511.

The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Fridays.
